

CNC Programmer and Machinist

Magnatech is in search of a Programmer/Machinist to work with both Engineering and our Machine Shop to provide the bridge of code, fixtures, and tooling necessary to manufacture precision components. We use Mastercam to convert Pro-E or Inventor models to code for HAAS milling and turning machinery, along with Prototraks and manual tools.

We offer a small-company atmosphere and above-average compensation with a benefits package including medical, dental, paid holidays, vacation, and a 401K Plan. Applicants should provide resumes indicating education and experience via any of the following three methods:

E-mail: info@MagnatechLLC.com

Fax: (860) 653-0486
