

Senior Electrical Engineer – Product Development

A successful, well established, rapidly growing manufacturer of highly sophisticated precision electromechanical equipment located in North Central Connecticut is in search of a high energy self starter to join its engineering team. We are one of the world's leading manufacturers of orbital welding systems. Our product lines are considered the premier products in the industry.

The successful candidate will possess an MSEE and have ten to fifteen years experience in digital and analog circuitry design. Our engineering department operates in a project oriented environment. The individual we are seeking will be involved in all aspects of the design process and be capable of taking a project from concept to finished product. You must be a self-starter that is detail oriented. Excellent verbal and written communication skills as well as excellent organizational skills are required. The individual we are seeking will have a working knowledge of the most popular CAD programs and all Microsoft Office applications.

The individual we are seeking will possess excellent organizational skills and be capable of assuming a managerial position in the future. This will be a key position that will be instrumental in the future success of the company.

The responsibilities of the position include but are not limited to the following:

1. Operational Responsibilities.

- Product Line Responsibilities: Responsible for electrical issues related to products from the initial design and throughout the products life cycle.
- Product Line Development: Develop enhancements to current products as they move through their life cycle.
- Production Issues: Troubleshoot and solve issues related to the electrical or electronic systems in production.
- Customer Service: Provide service to customers that are experiencing electrical problems with products in the field.

2. Product Development Responsibilities.

- Provide electrical and electronics design for new products from initial concept to normal production.

3. Customer Service Responsibilities.

- Functional liaison between the customer and the company. Provide telephone support to customers dealing with all electrical or electronics issues.

This is an excellent opportunity. We have an established product line that is considered to be the best in the industry. The successful candidate will have the opportunity to work with cutting edge technology and develop products that will change the industry. An excellent compensation and benefits package will be offered to the successful candidate. Please include a salary history and expectations with the response to this ad.
